| Exercise Title: Using HTML Forms, Media, Links, Maps, and Images |  | Laboratory Activity 6 |  | Score:   | / 50 |

## Objectives

At the end of this activity, you should be able to:

- Build a multi-section web page for a simple transportation app using HTML only (no CSS or JavaScript).
- Create forms that use different input types (text, tel, email, date, time, number, select, radio, checkbox, range, file) and a `<textarea>`.
- Insert and describe images with `<img>`, `<figure>`, and `<figcaption>`, and create a clickable image map.
- Embed a map, a video, an audio clip, and an online video using `<iframe>`, `<video>`, and `<audio>`.
- Create internal, external, `tel:`, and `mailto:` links, and organize data using a table.

## Materials and Tools

- A code editor (e.g., Visual Studio Code, Notepad++, or Sublime Text).
- A web browser (e.g., Google Chrome, Microsoft Edge, or Mozilla Firefox).
- An internet connection (needed to load the map, video, audio, and online images).
- Optional: your own photos of vehicles saved in an images folder.

## Before You Begin

- Create a folder for this activity (e.g., GoRide) and keep all your files there.
- Work independently. Type the code yourself instead of copying and pasting, and add a comment only where it helps explain your code.
- Use HTML only. Do not use CSS or JavaScript in this activity.
- Save your work often and refresh the browser after every change so you can check your progress.
- Compare your finished page with the **Sample Output** shown after the instructions.

## Instructions

You will build **GoRide**, a simple transportation app website. The page contains a booking form, vehicle images, a map, media, a schedule table, a feedback form, and useful links.

### Step 1. Create the Document and Header

1. Open your code editor and create a new file.
2. Save it as **Lastname\_TransportApp.html** (replace "Lastname" with your own last name; do not use spaces).
3. Type the basic HTML structure, which must include:
  - The `<!DOCTYPE html>` declaration on the first line and `<html lang="en">` wrapping the entire page.
  - A `<head>` containing `<meta charset="UTF-8">`, a viewport `<meta>`, and a descriptive `<title>` (e.g., "GoRide - Transportation App").
  - A `<body>` that contains all visible content.
4. Inside the `<body>`, add a `<header>` containing an `<h1>` with the text "GoRide", a tagline inside `<p><em>...</em></p>`, and a `<nav>`.
5. In the `<nav>`, create six internal links separated by " | ": **Book a Ride, Our Vehicles, Map, Media, Schedule, Contact**. Each link uses `href="#id"`, where the id matches the section you will create in the next steps (book, fleet, map, media, schedule, contact).
6. End the header with an `<hr>` line. Indent nested tags consistently (2 or 4 spaces).

## Step 2. Build the Booking Form

1. Add a `<main>` element, then a `<section id="book">` with an `<h2>` titled "Book a Ride".
2. Inside the section, add a `<form action="#" method="post">` containing a `<fieldset>` with the `<legend>` "Trip Details". Place the following controls inside it, each in its own `<p>` with a connected `<label>` (the `for` attribute must match the input's `id`):
  - **Full name:** `type="text"` with a placeholder and the `required` attribute.
  - **Phone number:** `type="tel"` with a placeholder and `required`.
  - **Email:** `type="email"` with a placeholder.
  - **Pick-up and Drop-off locations:** text inputs that use `list="places"`. Add a `<datalist id="places">` with at least five `<option>` values (e.g., Central Terminal, City Hall, Airport, University Campus, Public Market).
  - **Date** (`type="date"`) and **Time** (`type="time"`), both `required`.
  - **Passengers:** `type="number"` with `min="1"`, `max="10"`, and `value="1"`.
  - **Vehicle type:** a `<select>` with at least five `<option>` items (Taxi, Van, Shuttle Bus, Motorcycle Taxi, Tricycle).
  - **Payment method:** three radio buttons (Cash, Card, E-Wallet) that share the same name, each with a different value. Make Cash checked by default.
  - **Extras:** three checkboxes (Extra luggage, Child seat, Wheelchair accessible), each with its own value.
  - **Notes for the driver:** a `<textarea>` with `rows`, `cols`, and a placeholder.
  - **Terms:** a `required` checkbox with the label "I agree to the Terms & Conditions", where "Terms & Conditions" is a link to `#terms-info`.
  - **Buttons:** a submit button labeled "Book Now" and a reset button labeled "Clear" (use `<button type="submit">` and `<button type="reset">`).
3. Close the section with an `<hr>`.

## Step 3. Add the Vehicle Images

1. Create a `<section id="fleet">` with an `<h2>` titled "Our Vehicles".
2. Add three `<figure>` elements (Taxi, Van, Shuttle Bus). Each figure must contain an `<img>` with `src`, a meaningful `alt` text, and `width` and `height` attributes, followed by a `<figcaption>` with the vehicle name in `<strong>` and a short description.
3. You may use placeholder images such as `https://placehold.co/400x250?text=Taxi`, or your own files (e.g., `images/taxi.jpg`).
4. Add a `<small>` note under the figures reminding readers that the placeholders can be replaced with real photos, then add an `<hr>`.

## Step 4. Add the Map and Image Map

1. Create a `<section id="map">` with an `<h2>` titled "Find Our Stops" and a short `<p>` that introduces the map.
2. Embed an OpenStreetMap using an `<iframe>` with a `title`, `width="600"`, and `height="400"`. Use the embed URL format: `https://www.openstreetmap.org/export/embed.html?bbox=...&layer=mapnik&marker=LAT%2CLON`. Use the coordinates of your own city or terminal.
3. Below the map, add a link labeled "View larger map" that opens the full OpenStreetMap page in a new tab (`target="_blank"` and `rel="noopener"`).
4. Add an `<h3>` titled "Image Map: Route Overview". Insert an image of a route with three stops (Terminal, City Hall, Airport) using `usemap="#routemap"`.
5. Create a `<map name="routemap">` with three `<area shape="rect">` elements. Each area has `coords`, `href` (pointing to `#schedule`), and `alt` text.
6. Close the section with an `<hr>`.

## Step 5. Add Video and Audio

1. Create a `<section id="media">` with an `<h2>` titled "Media".
2. Under an `<h3>` titled "How GoRide Works (Video)", add a `<video width="480" controls>` with a poster image, two `<source>` tags (MP4 and OGG), and fallback text for browsers that do not support video.
3. Under an `<h3>` titled "Driver Announcement (Audio)", add an `<audio controls>` with two `<source>` tags (MP3 and OGG) and fallback text.
4. Under an `<h3>` titled "Watch on YouTube (Embedded)", embed a YouTube video using an `<iframe>` with the `/embed/` URL, a `title`, and `allowfullscreen`.
5. Close the section with an `<hr>`.

## Step 6. Create the Schedule Table and Route Form

1. Create a `<section id="schedule">` with an `<h2>` titled "Shuttle Schedule".
2. Add a `<table border="1" cellpadding="6" cellspacing="0">` with a `<caption>` ("Daily departures from Central Terminal"), a `<thead>` with the headings **Route**, **Departure**, **Arrival**, **Fare**, and a `<tbody>` with at least four routes (e.g., Terminal to City Hall, University, Airport, Public Market).
3. Add an `<h3>` titled "Check Your Route", then a second form (`method="get"`) with a labeled `<select>` that lists the same routes and a "Search" submit button.
4. Close the section with an `<hr>`.

## Step 7. Create the Contact and Feedback Section

1. Create a `<section id="contact">` with an `<h2>` titled "Contact & Feedback".
2. Add a form with `enctype="multipart/form-data"` and a `<fieldset>` with the `<legend>` "Send Feedback". Include these labeled controls:
  - **Your name:** a required text input.
  - **Rate your ride (1-5):** `type="range"` with `min="1"`, `max="5"`, and `value="5"`.
  - **Topic:** a `<select>` (Compliment, Complaint, Lost item, Suggestion).
  - **Message:** a required `<textarea>` with `rows` and `cols`.
  - **Attach a photo (optional):** `type="file"` with `accept="image/*"`.
  - A submit button labeled "Send Feedback".
3. Under an `<h3>` titled "Reach Us", add an `<address>` block with the company name and address, a phone number as a `tel:` link, and an email address as a `mailto:` link. Use `<br>` for the line breaks.
4. Close the section with an `<hr>`.

## Step 8. Add Links, Terms, and Footer

1. Create a `<section id="links">` with an `<h2>` titled "Useful Links" and an unordered list (`<ul>`) of four links: OpenStreetMap, Google Maps, a Facebook page (all open in a new tab), and "Back to top" (an internal link to `#top`).
2. Create a `<section id="terms-info">` with an `<h2>` titled "Terms & Conditions" and a `<details>` element whose `<summary>` is "Read the terms". Inside, add an ordered list (`<ol>`) of at least three rules.
3. Close `</main>`, then add a `<footer>` with an `<hr>` and a copyright line using `&copy;`.

## Step 9. Test Your Work

Open your file in a web browser (with internet access) and check that:

- The navigation links jump to the correct sections, and "Back to top" returns to the top of the page.
- The booking form shows all required controls; only one payment option can be selected at a time, and more than one extra can be selected.
- Clicking a label activates (focuses or selects) its matching input.
- Pressing "Book Now" with empty required fields, or an invalid email, shows a browser validation message. "Clear" resets the form.
- The three vehicle images display (or show their alt text if a file path is wrong).
- The map displays, and "View larger map" opens in a new tab. Clicking each area of the route image goes to the Schedule section.
- The video and audio play with the built-in controls, and the YouTube video loads.
- The schedule table displays borders, a caption, and the heading row.
- The phone link and email link respond when clicked, and the "Read the terms" section expands and collapses.

## Step 10. Save and Submit

1. Confirm that the file name is **Lastname\_TransportApp.html**.
2. Submit the .html file through the platform or channel designated by your instructor, on or before the deadline.
3. Send the link for the github repository and live website.

## Sample Output

Your page should look similar to the screenshots below. Your own text, images, and map location may differ. Note: in these sample screenshots, the online images, map, and YouTube video appear blocked because the preview had no internet access; they load normally when the file is opened in a browser with an internet connection.

## Suggested Structure (Guide Only)

---

Use this outline to plan your code. Fill in the missing parts yourself; do not copy it as-is.

```
<!DOCTYPE html>
<html lang="en">
  <head>
    ... <!-- meta charset, viewport, and title -->
  </head>
  <body>
    <header> ...h1, tagline, nav with 6 internal links, hr... </header>
    <main>
      <section id="book"> ...h2 + form (fieldset, labels, inputs, select, radio, checkbox, textarea,
buttons)... </section>
      <section id="fleet"> ...h2 + 3 figures (img + figcaption)... </section>
      <section id="map"> ...h2 + iframe map + link + image map (img, map, area)... </section>
      <section id="media"> ...h2 + video + audio + YouTube iframe... </section>
      <section id="schedule"> ...h2 + table + route form... </section>
      <section id="contact"> ...h2 + feedback form + address (tel and mailto links)... </section>
      <section id="links"> ...h2 + ul of links... </section>
      <section id="terms-info"> ...h2 + details/summary + ol... </section>
    </main>
    <footer> ...hr + copyright... </footer>
  </body>
</html>
```

## Grading Rubric (Likert Scale: 1–3)

---

| Rating | Level             | General Meaning                                                     |
|--------|-------------------|---------------------------------------------------------------------|
| 3      | Excellent         | Fully meets the requirement; complete, correct, and well-organized. |
| 2      | Satisfactory      | Partially meets the requirement; minor errors or omissions.         |
| 1      | Needs Improvement | Does not meet the requirement; major errors, or missing entirely.   |

| Criteria                                                 | 3 – Excellent                                                                                                                                                           | 2 – Satisfactory                                                                                                                    | 1 – Needs Improvement                                                                                         |
|----------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------|
| <b>A. Document Structure and Navigation (2 criteria)</b> |                                                                                                                                                                         |                                                                                                                                     |                                                                                                               |
| <b>1. Document Skeleton and Title</b>                    | Has <!DOCTYPE html> and correctly nested <html>, <head>, and <body>; has a descriptive <title> and consistent indentation. Nothing is missing or misplaced.             | Has the DOCTYPE and all three tags, but one is misplaced, the title is generic (e.g., "Document"), or indentation is inconsistent.  | DOCTYPE is missing, two or more required tags are missing, or the code is mostly unindented and hard to read. |
| <b>2. Header and Navigation</b>                          | <header> has an <h1>, a tagline, and a <nav> with six working internal links (href="#id") that match the section ids.                                                   | Header and nav are present, but one or two links are broken or do not match a section id.                                           | Navigation is missing, or most links do not work.                                                             |
| <b>B. Forms and Labels (3 criteria)</b>                  |                                                                                                                                                                         |                                                                                                                                     |                                                                                                               |
| <b>3. Booking Form Inputs</b>                            | Booking form includes text, tel, email, date, time, number, a datalist, and a select; required/placeholder attributes are used; all are inside a <form>.                | Most inputs are present, but some types or attributes are incomplete (e.g., email uses type="text", no datalist or required).       | Only a few inputs are present, or controls are outside the <form> tag.                                        |
| <b>4. Radio, Checkbox, Textarea, and Buttons</b>         | Radio buttons share one name and have values; at least three checkboxes; a <textarea> with rows/cols; submit and reset buttons are labeled.                             | All elements are present, but name/value/rows/cols or button labels are incomplete or inconsistent.                                 | One or more element types are missing, or radio buttons are not grouped.                                      |
| <b>5. Labels, Fieldset, and Feedback Form</b>            | Every control has a <label for> matching its id; <fieldset>/<legend> are used; the feedback form includes range, select, textarea, and file inputs.                     | Most controls have labels, or fieldset/legend or one feedback control is missing.                                                   | Labels are mostly missing, or fieldset/legend and the feedback form are not used.                             |
| <b>C. Images, Maps, and Media (3 criteria)</b>           |                                                                                                                                                                         |                                                                                                                                     |                                                                                                               |
| <b>6. Images and Figures</b>                             | At least three <figure> elements with <img> (src, alt, width, height) and <figcaption>; the route image works as a clickable image map with <map> and <area>.           | Images are shown, but alt/size attributes, figcaptions, or the image map are incomplete.                                            | Images are missing or broken, or the image map is not used.                                                   |
| <b>7. Map and Map Links</b>                              | OpenStreetMap <iframe> with title, width, and height displays the correct location; a "View larger map" link opens in a new tab with rel="noopener".                    | The map is embedded but the location, title/size, or the larger-map link is incomplete.                                             | The map is missing or does not display, and there is no map link.                                             |
| <b>8. Video, Audio, and Embedded Video</b>               | <video controls> with poster and sources, <audio controls> with sources, and a YouTube <iframe> are all present, with fallback text.                                    | Two of the three media elements work, or the controls/sources/fallback text are incomplete.                                         | Only one media element is present, or none of them work.                                                      |
| <b>D. Links, Tables, and Submission (2 criteria)</b>     |                                                                                                                                                                         |                                                                                                                                     |                                                                                                               |
| <b>9. Links, Table, and Other Elements</b>               | Schedule <table> has caption, thead, and tbody; tel: and mailto: links, external links with target="_blank", <address>, <details>, and <footer> are all used correctly. | Most of these elements are used, but one or two are missing or incorrect (e.g., table without thead, no mailto link).               | The table is missing or broken, and most of the links and other elements are not used.                        |
| <b>10. File Name and Timeliness</b>                      | File is named correctly (Lastname_TransportApp.html), opens properly in a browser, and is submitted on time.                                                            | File name is slightly incorrect (e.g., wrong capitalization or spacing), or it is submitted late (within the allowed grace period). | File name does not follow the convention, the file does not open, or it is submitted very late.               |

#### Points Distribution

| Category                             | No. of Criteria | Max Raw Score (x3) | Equivalent Points (/50) |
|--------------------------------------|-----------------|--------------------|-------------------------|
| A. Document Structure and Navigation | 2               | 6                  | 10                      |
| B. Forms and Labels                  | 3               | 9                  | 15                      |
| C. Images, Maps, and Media           | 3               | 9                  | 15                      |
| D. Links, Tables, and Submission     | 2               | 6                  | 10                      |
| <b>TOTAL</b>                         | <b>10</b>       | <b>30</b>          | <b>50</b>               |
